

## Quick Start Guide

Cash in on rebate savings with the following checklist:

- A completed rebate form
- Available via [www.cleco.com/commercial-kitchen-rebate](http://www.cleco.com/commercial-kitchen-rebate)
- Proof of purchase for each claimed ENERGY STAR unit
- Model and serial number for each claimed unit
- Photo of each installed unit
- Documentation must be submitted within 60 days of purchase

*Program funding is limited, and participation is on a first-come, first-served basis. Offerings are subject to change without notice. Please allow four to six weeks for processing. This offer is exclusive to installation sites located in the Cleco Power service territory.*

## COMMERCIAL KITCHEN EQUIPMENT REBATE PROGRAM

### Apply Today!

With Cleco rebates of up to **\$1,500**, investing in energy-efficient equipment can deliver operational cost savings of up to **\$5,300** for your kitchen — annually.

Save energy and money while boosting your kitchen's performance!

## It Pays to Upgrade

Invest in ENERGY STAR-rated appliances to reduce your operational costs.

Restaurants are some of the most significant energy-consuming investments.

- Owners and investors face narrow profit margins - which can be aggravated by ineffective or high energy usage.
- Commercial kitchens use two to three times more energy per square foot than any other commercial buildings.
- Cooking, water heating, refrigeration, and space heating account for nearly 80 percent of restaurants' average energy usage.
- Ineffective or idle equipment stack up energy costs and can contribute to other losses such as food waste, leading to decreased profits.
- A suite of ENERGY STAR-rated commercial food service equipment could save about 99,644 kWh/year, or nearly \$5,300/year.

## OUR PROGRAM OFFERS:

Rebates from \$30 to \$1,500 on select items

Rebate program applicable to a full range of energy-efficient equipment categories

See a comprehensive list of ENERGY STAR equipment at:

[www.energystar.gov/productfinder](http://www.energystar.gov/productfinder)

## Rebate Snapshot

## START YOUR UPGRADE TODAY!

Additional incentives and energy savings are available to Cleco Power commercial customers.

## Additional Incentives and kWh Savings

The Cleco Power Wise™ Commercial Program can help businesses like yours reduce energy use.

Financial incentives are available for the following energy efficiency upgrades:

- Lighting
- HVAC change-outs, including split-system air conditioners, heat pumps and chillers

Incentives can pay up to 100 percent of the improvement cost.

Small businesses can even apply for a complimentary business kit filled with easy-to-install, energy-saving products.
