

Date of Update: April 24, 2012

Cleco has updated this database of generator interconnection request to the Cleco system to meet the requirements of FERC Order No. 2003. Cleco plans to meet FERC's requirement on a prospective basis beginning with "Queue Position" number 16. For existing and completed interconnection study request, Cleco will continue to post relevant information to the extent it has such information. Cleco includes FERC jurisdictional Small Generators and Large Generators in this queue, as well as all LPSC jurisdictional generators. Customer names are provided only when an executed or unexecuted Interconnection and Operating Agreement (IOA) or Large Generator Interconnection Agreement (LGIA) has been filed with FERC.

Order data fields applicable	2003 Queue Position	Project ID	Max Summer Output (MW)	Max Winter Output (MW)	County/Parish	State	Location Substation	Location Line	Original Customer-Provided In-Service Date	Revised Customer-Provided In-Service Date	Study Status	Date of Last Status Update	Service Product	Studies Available (Y/N)	Date/Time of Completed Application	Type of Generating Facility	Fuel/Prime Mover Type	Was this study request terminated without an interconnection being completed? (Y/N)	If "Yes" specify study termination reason	Feasibility Study Due Date	Most Current Feasibility Study Due Date	System Impact Study Due Date	Most Current System Impact Study Due Date	Facilities Study Due Date	Most Current Facilities Study Due Date	Optional Interconnection Studies Due Date	Most Current Optional Interconnection Studies Due Date	Other Affected Systems	Other Affected Systems' Studies	Interconnection & Operating Agreement of SGIA, LGIA or IAQF Executed Date	Customer Name
