

Hot Spot

Electrical Safety Awareness Program

When you pass by a socket, keep your hands in your pocket. Never play with fire, never touch downed wire. When you play outside, obey the danger signs. Please stay alert, and you won't get hurt.

These are Hot Spots, don't touch them. Call Cleco. Don't touch them. These are Hot Spots, don't touch them. Call Cleco. Don't touch them.

When you fly a kite, make sure you do it right. Stay away from power lines, and you'll be just fine. Electricity and water, they just don't mix. It's like a cat and a mouse, it's not a good fit.

These are Hot Spots, don't touch them. Call Cleco. Don't touch them. These are Hot Spots, don't touch them. Call Cleco. Don't touch them.

You can't see it, can't touch it, and it has no sound, electricity is looking for a path to ground. Cleco wants you safe each and every day, so watch out for Hot Spots and you'll be OK.

These are Hot Spots, don't touch them. Call Cleco. Don't touch them. These are Hot Spots, don't touch them. Call Cleco. Don't touch them.

Cleco cares about your safety. If you see a Hot Spot, call Cleco at 1-800-622-6537.
