1.0 INTRODUCTION

Cleco Power LLC (Cleco) owns and operates the Brame Energy Center (BEC), an electric utility power station near Boyce, Rapides Parish, Louisiana. Cleco received a solid waste permit, Permit P-0005-R1, from Louisiana Department of Environmental Quality (LDEQ) to construct and operate the Unit 2 Metal Cleaning Waste Pond, the Bottom Ash Pond, and the Fly Ash Pond which are all located within the BEC property. A Site Map is included as **Figure 1**.

The Fly Ash Pond stopped accepting waste on April 11, 2021, and initiated closure activities as defined by the CCR regulations (contracting and design) prior to May 11, 2021. The Closure Plan was submitted to the LDEQ on September 8, 2021. On August 11, 2022, the LDEQ approved the Closure Plan for the Fly Ash Pond. In preparation for implementation of the Fly Ash Pond Closure Plan, a 90-day closure notification was submitted to the LDEQ on January 13, 2023.

The Fly Ash Pond received fly ash, abrasives, sodium carbonate (tank bottoms), neutralized waste/fly ash, and spent activated carbon/trona via trucks. Excavated sludge from the metal cleaning waste ponds was also placed in the Fly Ash Pond on an as-needed basis.

The waste surface area of the Fly Ash Pond was approximately 36 acres as noted in P-0005-R1, however the overall size of the Fly Ash Pond was approximately 43.3 acres. The estimate of maximum inventory ever on site for the Fly Ash Pond was 530,000 cubic yards.

This Closure Certification Report has been prepared to document the closure of the Fly Ash Pond in accordance with the solid waste regulations and the facility's approved Closure Plan.

Upon final approval of closure, the footprint of the Fly Ash Pond will be used as landfill footprint for the Ash Management Landfill (P-0379-R1-M2). The groundwater monitoring network will remain in place and will continue to be sampled in accordance with the approved permit and the solid waste regulations.

2.0 CLOSURE ACTIVITIES

2.1 Pond Dewatering

Standing water within the Fly Ash Pond was pumped to the adjacent Bottom Ash Pond. The ash forms a cement-type material when wet; therefore, excess storm water was pumped to the Bottom Ash Pond. Dewatering was achieved by using the existing pump system that discharged to the Bottom Ash Pond.

2.2 Solids Removal

Once dewatering of the Fly Ash Pond was completed, the remaining waste within the pond was removed by mechanical excavation. Waste material was placed in haul trucks and transported to the on-site permitted landfill (Ash Management Landfill P-0379-R1-M2). Approximately 447,000 cubic yards of fly ash material and underlying soils were removed and transported to Cell 4 of the Ash Management Landfill. Once all Fly Ash was removed and the clay liner was exposed, approximately six inches of the existing clay liner material from the bottom and along a portion of the side slopes was also removed.

2.3 Confirmatory Soil Sample Collection

After all visible waste and six inches of clay liner were removed from the base and a portion of the sidewalls of the impoundment, soil sampling to support the risk-based closure of the Fly Ash Pond was conducted in accordance with approved Closure Plan and with LDEQ Risk Evaluation/Corrective Action Program (RECAP) requirements. Confirmatory sampling results are summarized in **Table 1**.

Confirmatory sampling events took place in two phases to facilitate the project timeline. The initial confirmatory soil sampling event took place on September 6-7, 2023. Three sampling locations were resampled on October 9, 2023, at new excavation depths.

2.3.1 Soil Sample Locations

The Fly Ash Pond was divided into 42 one-acre quadrants and two samples from each quadrant representing the base of the impoundment for each acre were obtained (designated with an A and/or B). One sample per acre from the side slopes were taken from each quadrant. Sample locations are shown are **Figure 2**.

To ensure that the remaining constituent concentrations are protective of human health and the environment, confirmatory samples were compared to LDEQ RECAP standards. Due to residual concentrations exceeding the applicable screening standards for vanadium in three locations, Cleco elected to remove approximately four inches of additional material in the corresponding quadrants with exceeding vanadium values (see **Figure 3**). These three sampling locations were resampled on October 9, 2023, at the new excavation depths.

2.3.2 Soil Sample Collection

Field decontamination procedures were performed on all sampling equipment before each sample was collected. Discreet soil samples were collected using a hand-auger device at each dry pond bottom and side slope location from zero to six-inch depth interval. Soil samples were processed and placed into laboratory supplied sample containers, preserved at four degrees Celsius, transported and relinquished to the laboratory for analyses using chain-of-custody SW-846 sampling protocol.

2.3.3 Soil Sample Analyses

All soil samples collected from the grid sampling locations were analyzed for the following parameters in accordance with the approved Closure Plan:

- pH
- Sulfate
- Arsenic
- Cadmium
- Copper
- Nickel
- Vanadium
- Zinc

The subcontracted analytical laboratory was Waypoint Analytical Louisiana, Inc., a Louisiana Environmental Laboratory Accreditation Program (LELAP)-approved laboratory. Analytical laboratory reports are included in **Attachment A**.

2.3.4 Soil Sample Analytical Results

Soil analytical data is summarized in **Table 1** and compares all post-excavation sample results to the LDEQ RECAP Screening-Option Standards (LSS). Sample results from post-excavation samples were less than the RECAP LSS except for vanadium at locations CS-5A, CS-14A, and CS-18A (**Figure 3**). These areas were over-excavated and an additional four inches of soil was removed and the areas were resampled for vanadium. As a result, all post-excavation sample results were less than LDEQ RECAP LSS and the remaining concentrations are acceptable and protective of human health and the environment. Copies of the analytical laboratory reports are provided in **Attachment A**.

Sulfate and pH were collected in accordance with the approved Closure Plan. However, RECAP does not provide a risk-based comparative standard for either constituent. Soil pH ranged between 5-9 standard units within the impoundment and sulfate concentration ranged in value from approximately 30,000 milligrams per kilogram (mg/kg) to less than 100 mg/kg.

2.4 Confirmation Groundwater Sample Collection

Three temporary monitoring wells (SB-01, SB-02, and SB-03) were installed in the upper permeable zone to characterize groundwater. The temporary monitoring wells were installed in accordance with the LDEQ-approved Closure Plan and the *Construction of Geotechnical Boreholes and Groundwater Monitoring Systems Handbook*, “the handbook”, prepared by the Louisiana Department of Environmental Quality (LDEQ) and the Louisiana Department of Transportation and Development (LDOTD), dated December 2000.

2.4.1 Groundwater Sample Locations

The temporary monitoring well locations are included on **Figure 4**. SB-01 was installed to a depth of 25 feet below ground surface (ft. bgs). SB-02 and SB-03 were installed to a depth of 25 ft. bgs; however, the water bearing zone was not encountered. These two locations were relocated and reinstalled as SB-02R and SB-03R. SB-02R was installed at approximately 35 ft. bgs, produced water, and was sampled; however, the replacement well location of SB-03 did not encounter the uppermost water bearing zone. SB-03R did not encounter a groundwater bearing zone up to 41 ft. bgs and a groundwater sample was not collected.

The temporary monitoring wells were plugged and abandoned after groundwater samples were collected.

2.4.2 Groundwater Sample Collection

Groundwater samples were collected from two temporary monitoring wells using a peristaltic pump and dedicated disposable sample tubing. Samples were placed

immediately into laboratory supplied sample containers, preserved at four degrees Celsius, transported, and relinquished to the laboratory for analyses using chain-of-custody SW-846 sampling protocol. Sampling forms are in **Attachment B**.

2.4.3 Groundwater Sample Analyses

Groundwater samples collected from the grid sampling locations were analyzed for the following parameters in accordance with the approved Closure Plan:

- pH
- Sulfate
- Arsenic
- Cadmium
- Copper
- Nickel
- Vanadium
- Zinc

Laboratory analyses were performed by Waypoint Analytical Louisiana, Inc., a LELAP approved laboratory.

2.4.4 Groundwater Sample Analytical Results

Groundwater sample results are summarized in **Table 2** and include a comparison to the LDEQ RECAP Groundwater Screening Standard. Sample results reported concentrations that exceed the Groundwater Screening Standard for arsenic, nickel, and vanadium. Prior to placement of waste in the Fly Ash Impoundment, Cleco developed and implemented a comprehensive semiannual groundwater monitoring program as required by LDEQ. Groundwater monitoring has been performed and submitted to LDEQ semiannually for the entirety of this period. During this time, there have been no verified statistically significantly increases that would indicate groundwater has been affected by the impoundment. Groundwater monitoring of the uppermost permeable zone will continue through the closure period of the impoundment. The groundwater quality will be monitored semiannually and submitted to the LDEQ.

The Fly Ash Pond footprint was recently incorporated into the Ash Management Landfill permit. The former Fly Ash Pond area will be converted into additional landfill space and will accept waste that are similar to waste accepted at the impoundment. The existing groundwater monitoring network for the Ash Management footprint (that includes the Ash Management Landfill, Fly Ash and Bottom Ash ponds) will remain unchanged and continue to be monitored.

3.0 CLOSURE CERTIFICATION

At this time, closure requirements outlined in the facility's approved Closure Plan have been met. Cleco is requesting a closure inspection from the LDEQ as required by Louisiana Administrative Code (LAC) 33:407.E.

Ref: Report Number: 23-251-0024
Project Description: 002-302
Cleco Brame-Fly Ash Pond
Lena, Rapides Parish, LA

Dear Emily Welch:

Waypoint Analytical Louisiana, Inc. received sample(s) on 9/8/2023 for the analyses presented in the following report. The above referenced project has been analyzed per your instructions. Unless otherwise noted, the analyses were performed in our laboratory in accordance with Standard Methods, The Solid Waste Manual SW-846, EPA Methods for Chemical Analysis of Water and Wastes and /or 40 CFR part 136.

Certain parameters (chlorine, pH, dissolved oxygen, sulfite...) are required to be analyzed within 15 minutes of sampling. Usually, but not always, any field parameter analyzed at the laboratory is outside of this holding time. Refer to sample analysis time for confirmation of holding time compliance. Analyses reported which indicate "Field" for these parameters were analyzed by the client in the field. Results for solid samples are reported on an as received or "wet weight" basis unless otherwise specified.

The analytical data has been validated using standard quality control measures performed as required by the analytical method. Quality Assurance, method validations, instrumentation maintenance and calibration for all parameters (NELAP and non-NELAP) were performed in accordance with guidelines established by the USEPA (including 40 CFR 136 Method Update Rule May 2021) and NELAC unless otherwise indicated. Any parameter for which the laboratory is not officially NELAP accredited is indicated by a '~' symbol. These are not included in the scope because NELAP accreditation is either not available or has not been applied for. Additional certifications may be held/are available for parameters, where NELAP accreditation is not required or applicable. A full list of certifications is available upon request.

All quality control measures undertaken in accordance with Waypoint Analytical Louisiana, Inc. CompQAP990807A and revisions under the terms of the Louisiana Environmental Laboratory Accreditation Program (Certificate #02041) are within acceptance ranges established in that document with the exception of the items indicated and/or discussed in a Case Narrative.

The results are shown on the attached analysis sheet(s). Be aware that the time analyzed for certain samples (e.g. - BOD, CBOD, etc.) refer to the time the sample batch was begun and not necessarily to the time an individual sample was begun. Thank you for allowing Waypoint Analytical Louisiana, Inc. to serve you. Should I be of further assistance, if you have any questions or need additional information please contact me or client services.

Sincerely,

Amy Jackson
Project Manager

Laboratory's liability in any claim relating to analyses performed shall be limited to, at laboratory's option, repeating the analysis in question at laboratory's expense, or the refund of the charges paid for performance of said analysis. This report may be reproduced in full only with the written permission of the laboratory and/or the entity to which it is addressed. Results contained herein relate only to the sample(s) submitted to the laboratory.

CASE NARRATIVE

Metals Analysis Method 6010D

Sample 61660 (CS - 4B)

Analyte: Arsenic

QC Batch No: A85900/A85764

The matrix spike and/or the matrix spike duplicate was outside quality control acceptance ranges. A post digestion spike was performed and passed quality control acceptance ranges. No matrix interference is suspected.

Sample 61660 (CS - 4B)

Analyte: Arsenic

QC Batch No: A85900/A85764

Relative Percent Difference (RPD) for the duplicate analysis was outside of the allowable QC limits.

Analyte: Cadmium

QC Batch No: A85970/A85764

CCB failed high sample non-detect

Analyte: Copper

QC Batch No: A85900/A85764

CCB fail LRB non-detect

Sample 61653 (CS - 1A)

Analyte: Copper

QC Batch No: A85900/A85764

Sample >10x CCB

Sample 61660 (CS - 4B)

Analyte: Copper

QC Batch No: A85900/A85764

Sample >10x CCB

Sample 61699 (CS - 25A)

Analyte: Arsenic

QC Batch No: A85917/A85848

The matrix spike and/or the matrix spike duplicate was outside quality control acceptance ranges. A post digestion spike was performed and passed quality control acceptance ranges. No matrix interference is suspected.

Sample 61699 (CS - 25A)

Analyte: Vanadium

QC Batch No: A85917/A85848

The matrix spike and/or the matrix spike duplicate was outside quality control acceptance ranges. A dilution test was performed and passed quality control acceptance ranges. No matrix interference is suspected.

Sample 61687 (CS - 18A)

Analyte: Arsenic

QC Batch No: A85917/A85850

The matrix spike and/or the matrix spike duplicate was outside quality control acceptance ranges. A post digestion spike was performed and passed quality control acceptance ranges. No matrix interference is suspected.

Sample 61687 (CS - 18A)

Analyte: Copper

QC Batch No: A85917/A85850

The matrix spike and/or the matrix spike duplicate was outside quality control acceptance ranges. A dilution test was performed and passed quality control acceptance ranges. No matrix interference is suspected.

Sample 61687 (CS - 18A)

Analyte: Vanadium

QC Batch No: A85917/A85850

The matrix spike, matrix spike duplicate and the dilution test were all outside of the quality control acceptance ranges. Matrix interference is suspected.

Sample 61375 (RW Composite)

Analyte: Arsenic

QC Batch No: A85970/A85903

The matrix spike and/or the matrix spike duplicate was outside quality control acceptance ranges. A post digestion spike was performed and passed quality control acceptance ranges. No matrix interference is suspected.

Sample 61375 (RW Composite)

Analyte: Cadmium

QC Batch No: A85970/A85903

CCB failed high sample non-detect

Sample 61713 (BD-02)

Analyte: Cadmium

QC Batch No: A85970/A85903

CCB failed high sample non-detect

Sample 61375 (RW Composite)

Analyte: Nickel

QC Batch No: A85970/A85903

LRB failed sample >10x LRB

Sample 61713 (BD-02)

Analyte: Nickel

QC Batch No: A85970/A85903

LRB failed sample >10x LRB

Sample 61714 (BD-03)

Analyte: Nickel

QC Batch No: A85970/A85903

LRB failed sample >10x LRB

Sample 61375 (RW Composite)

Analyte: Zinc

QC Batch No: A85970/A85903

The matrix spike and/or the matrix spike duplicate was outside quality control acceptance ranges. A dilution test was performed and passed quality control acceptance ranges. No matrix interference is suspected.

Anions by Ion Chromatography Method 9056

Sample 61660 (CS - 4B)

Analyte: Sulfate

QC Batch No: A85896/A85750

Matrix spike and/or matrix spike duplicate recoveries are outside of control limits. Acceptable LCS recovery indicates the system was in control, but the reported result could be affected by matrix interference.

Sample 61687 (CS - 18A)

Analyte: Sulfate

QC Batch No: A85897/A85751

Matrix spike and/or matrix spike duplicate recoveries are outside of control limits. Acceptable LCS recovery indicates the system was in control, but the reported result could be affected by matrix interference.

Sample 61699 (CS - 25A)

Analyte: Sulfate

QC Batch No: A85898/A85752

The MS/MSD recoveries are outside QC limits due to the level of analyte present in the parent sample relative to the spike level. RPD is based on the MS/MSD results and should be evaluated as laboratory duplicates.

Shipping container/coolier uncompromised? Yes No

Number of coolers/boxes received

Custody seals intact on shipping container/coolier? Yes No Not Present

Custody seals intact on sample bottles? Yes No Not Present

Chain of Custody (COC) present? Yes No

COC agrees with sample label(s)? Yes No

COC properly completed Yes No

Samples in proper containers? Yes No

Sample containers intact? Yes No

Sufficient sample volume for indicated test(s)? Yes No

All samples received within holding time? Yes No

Cooler temperature in compliance? Yes No

Cooler/Samples arrived at the laboratory on ice.
 Samples were considered acceptable as cooling process had begun.

Water - Sample containers properly preserved Yes No N/A

Water - VOA vials free of headspace Yes No N/A

Trip Blanks received with VOAs Yes No N/A

Soil VOA method 5035 – compliance criteria met Yes No N/A

High concentration container (48 hr) Low concentration EnCore samplers (48 hr)

High concentration pre-weighed (methanol -14 d) Low conc pre-weighed vials (Sod Bis -14 d)

Special precautions or instructions included? Yes No

Baton Rouge, LA, 70802

Ref: Report Number: 23-284-0001
Project Description: 002-302
Cleco Brame-Fly Ash Pond
Lena, Rapides Parish, LA

Dear Emily Welch:

Waypoint Analytical Louisiana, Inc. received sample(s) on 10/11/2023 for the analyses presented in the following report. The above referenced project has been analyzed per your instructions. Unless otherwise noted, the analyses were performed in our laboratory in accordance with Standard Methods, The Solid Waste Manual SW-846, EPA Methods for Chemical Analysis of Water and Wastes and /or 40 CFR part 136.

Certain parameters (chlorine, pH, dissolved oxygen, sulfite...) are required to be analyzed within 15 minutes of sampling. Usually, but not always, any field parameter analyzed at the laboratory is outside of this holding time. Refer to sample analysis time for confirmation of holding time compliance. Analyses reported which indicate "Field" for these parameters were analyzed by the client in the field. Results for solid samples are reported on an as received or "wet weight" basis unless otherwise specified.

The analytical data has been validated using standard quality control measures performed as required by the analytical method. Quality Assurance, method validations, instrumentation maintenance and calibration for all parameters (NELAP and non-NELAP) were performed in accordance with guidelines established by the USEPA (including 40 CFR 136 Method Update Rule May 2021) and NELAC unless otherwise indicated. Any parameter for which the laboratory is not officially NELAP accredited is indicated by a '~' symbol. These are not included in the scope because NELAP accreditation is either not available or has not been applied for. Additional certifications may be held/are available for parameters, where NELAP accreditation is not required or applicable. A full list of certifications is available upon request.

All quality control measures undertaken in accordance with Waypoint Analytical Louisiana, Inc. CompQAP990807A and revisions under the terms of the Louisiana Environmental Laboratory Accreditation Program (Certificate #02041) are within acceptance ranges established in that document with the exception of the items indicated and/or discussed in a Case Narrative.

The results are shown on the attached analysis sheet(s). Be aware that the time analyzed for certain samples (e.g. - BOD, CBOD, etc.) refer to the time the sample batch was begun and not necessarily to the time an individual sample was begun. Thank you for allowing Waypoint Analytical Louisiana, Inc. to serve you. Should I be of further assistance, if you have any questions or need additional information please contact me or client services.

Sincerely,

Amy Jackson
Project Manager

Laboratory's liability in any claim relating to analyses performed shall be limited to, at laboratory's option, repeating the analysis in question at laboratory's expense, or the refund of the charges paid for performance of said analysis. This report may be reproduced in full only with the written permission of the laboratory and/or the entity to which it is addressed. Results contained herein relate only to the sample(s) submitted to the laboratory.

CASE NARRATIVE

Metals Analysis Method 6010D

Sample 64263 (CS-33L)

Analyte: Arsenic

QC Batch No: A86743/A86692

The matrix spike and/or the matrix spike duplicate was outside quality control acceptance ranges. A post digestion spike was performed and passed quality control acceptance ranges. No matrix interference is suspected.

Anions by Ion Chromatography Method 9056

Sample 64263 (CS-33L)

Analyte: Sulfate

QC Batch No: A86693/A86674

Relative Percent Difference (RPD) for the duplicate analysis was outside of the allowable QC limits.

Sample 64263 (CS-33L)

Analyte: Sulfate

QC Batch No: A86693/A86674

Matrix spike duplicate recovery was outside QC acceptance limits, but LCS and MS recoveries were within limits.

Matrix interference is not suspected.

Ref: Report Number: 23-251-0025
Project Description: 002-302
Cleco Brame-Fly Ash Pond
Lena, Rapides Parish, LA

Dear Emily Welch:

Waypoint Analytical Louisiana, Inc. received sample(s) on 9/8/2023 for the analyses presented in the following report. The above referenced project has been analyzed per your instructions. Unless otherwise noted, the analyses were performed in our laboratory in accordance with Standard Methods, The Solid Waste Manual SW-846, EPA Methods for Chemical Analysis of Water and Wastes and /or 40 CFR part 136.

Certain parameters (chlorine, pH, dissolved oxygen, sulfite...) are required to be analyzed within 15 minutes of sampling. Usually, but not always, any field parameter analyzed at the laboratory is outside of this holding time. Refer to sample analysis time for confirmation of holding time compliance. Analyses reported which indicate "Field" for these parameters were analyzed by the client in the field. Results for solid samples are reported on an as received or "wet weight" basis unless otherwise specified.

The analytical data has been validated using standard quality control measures performed as required by the analytical method. Quality Assurance, method validations, instrumentation maintenance and calibration for all parameters (NELAP and non-NELAP) were performed in accordance with guidelines established by the USEPA (including 40 CFR 136 Method Update Rule May 2021) and NELAC unless otherwise indicated. Any parameter for which the laboratory is not officially NELAP accredited is indicated by a '~' symbol. These are not included in the scope because NELAP accreditation is either not available or has not been applied for. Additional certifications may be held/are available for parameters, where NELAP accreditation is not required or applicable. A full list of certifications is available upon request.

All quality control measures undertaken in accordance with Waypoint Analytical Louisiana, Inc. CompQAP990807A and revisions under the terms of the Louisiana Environmental Laboratory Accreditation Program (Certificate #02041) are within acceptance ranges established in that document with the exception of the items indicated and/or discussed in a Case Narrative.

The results are shown on the attached analysis sheet(s). Be aware that the time analyzed for certain samples (e.g. - BOD, CBOD, etc.) refer to the time the sample batch was begun and not necessarily to the time an individual sample was begun. Thank you for allowing Waypoint Analytical Louisiana, Inc. to serve you. Should I be of further assistance, if you have any questions or need additional information please contact me or client services.

Sincerely,

Amy Jackson
Project Manager

Laboratory's liability in any claim relating to analyses performed shall be limited to, at laboratory's option, repeating the analysis in question at laboratory's expense, or the refund of the charges paid for performance of said analysis. This report may be reproduced in full only with the written permission of the laboratory and/or the entity to which it is addressed. Results contained herein relate only to the sample(s) submitted to the laboratory.

Client: Providence Engineering
Project: 002-302
Lab Report Number: 23-251-0025
Date: 9/13/2023

CASE NARRATIVE

Metals Analysis Method 6010D

Sample 61675 (CS - 12A)

Analyte: Arsenic

QC Batch No: A85800/A85741

The matrix spike and/or the matrix spike duplicate was outside quality control acceptance ranges. A dilution test was performed and passed quality control acceptance ranges. No matrix interference is suspected.

Anions by Ion Chromatography Method 9056

Sample 61675 (CS - 12A)

Analyte: Sulfate

QC Batch No: A85747/A85738

Matrix spike/matrix spike duplicate recoveries are outside of control limits. Acceptable LCS recovery indicates the system was in control, but the reported result could be affected by matrix interference.

Ref: Report Number: 23-265-0027
Project Description: 002-302
Cleco Brame-Fly Ash Pond
Lena, Rapides Parish, LA

Dear Emily Welch:

Waypoint Analytical Louisiana, Inc. received sample(s) on 9/22/2023 for the analyses presented in the following report. The above referenced project has been analyzed per your instructions. Unless otherwise noted, the analyses were performed in our laboratory in accordance with Standard Methods, The Solid Waste Manual SW-846, EPA Methods for Chemical Analysis of Water and Wastes and /or 40 CFR part 136.

Certain parameters (chlorine, pH, dissolved oxygen, sulfite...) are required to be analyzed within 15 minutes of sampling. Usually, but not always, any field parameter analyzed at the laboratory is outside of this holding time. Refer to sample analysis time for confirmation of holding time compliance. Analyses reported which indicate "Field" for these parameters were analyzed by the client in the field. Results for solid samples are reported on an as received or "wet weight" basis unless otherwise specified.

The analytical data has been validated using standard quality control measures performed as required by the analytical method. Quality Assurance, method validations, instrumentation maintenance and calibration for all parameters (NELAP and non-NELAP) were performed in accordance with guidelines established by the USEPA (including 40 CFR 136 Method Update Rule May 2021) and NELAC unless otherwise indicated. Any parameter for which the laboratory is not officially NELAP accredited is indicated by a '~' symbol. These are not included in the scope because NELAP accreditation is either not available or has not been applied for. Additional certifications may be held/are available for parameters, where NELAP accreditation is not required or applicable. A full list of certifications is available upon request.

All quality control measures undertaken in accordance with Waypoint Analytical Louisiana, Inc. CompQAP990807A and revisions under the terms of the Louisiana Environmental Laboratory Accreditation Program (Certificate #02041) are within acceptance ranges established in that document with the exception of the items indicated and/or discussed in a Case Narrative.

The results are shown on the attached analysis sheet(s). Be aware that the time analyzed for certain samples (e.g. - BOD, CBOD, etc.) refer to the time the sample batch was begun and not necessarily to the time an individual sample was begun. Thank you for allowing Waypoint Analytical Louisiana, Inc. to serve you. Should I be of further assistance, if you have any questions or need additional information please contact me or client services.

Sincerely,

Amy Jackson
Project Manager

Laboratory's liability in any claim relating to analyses performed shall be limited to, at laboratory's option, repeating the analysis in question at laboratory's expense, or the refund of the charges paid for performance of said analysis. This report may be reproduced in full only with the written permission of the laboratory and/or the entity to which it is addressed. Results contained herein relate only to the sample(s) submitted to the laboratory.

CASE NARRATIVE

Metals Analysis Method 6010D

Sample 62751 (SB-01)

Analyte: Arsenic

QC Batch No: A86188/A86182

The matrix spike and/or the matrix spike duplicate was outside quality control acceptance ranges. A post digestion spike was performed and passed quality control acceptance ranges. No matrix interference is suspected.

Shipping container/coolers uncompromised? Yes No

Number of coolers/boxes received

Custody seals intact on shipping container/coolers? Yes No Not Present

Custody seals intact on sample bottles? Yes No Not Present

Chain of Custody (COC) present? Yes No

COC agrees with sample label(s)? Yes No

COC properly completed Yes No

Samples in proper containers? Yes No

Sample containers intact? Yes No

Sufficient sample volume for indicated test(s)? Yes No

All samples received within holding time? Yes No

Cooler temperature in compliance? Yes No

Cooler/Samples arrived at the laboratory on ice.
 Samples were considered acceptable as cooling process had begun.

Water - Sample containers properly preserved Yes No N/A

Water - VOA vials free of headspace Yes No N/A

Trip Blanks received with VOAs Yes No N/A

Soil VOA method 5035 – compliance criteria met Yes No N/A

High concentration container (48 hr) Low concentration EnCore samplers (48 hr)

High concentration pre-weighed (methanol -14 d) Low conc pre-weighed vials (Sod Bis -14 d)

Special precautions or instructions included? Yes No

Comments: pH sample was received outside of holding time. Approval to analyze per Emily Welch.

This message came from outside your organization.

Yes ma'am. We're aware pH analyses will be out of hold time.

Thanks,

Emily Welch, GIT

Emily,

Do we have permission to analyze the samples for pH past the 15 minutes hold time?

Amy Jackson

Project Manager

SAMPLING FORMS

PROVIDENCE

FLY ASH POND GROUNDWATER SAMPLE COLLECTION REPORT FORM

Project Name and Number: 002-302 Location: Cleco Brame – Rapides Parish
 Collector: Andrew Creel Boring No. L-1
 Fly Ash Grid: _____

TEMPORARY WELL INFORMATION

Evacuation:	Date/Time:	9-21-23 / 1420	Method of Evacuation:	Sub Peristaltic Pump
	Initial Depth to Water Level	16.67	Top of Casing to Bottom	37.92
	Gallons per Well Volume	3.47	Total Gallons Evacuated	3.5 dry
	Final Depth to Water	23.34	Elevation Top of Casing	_____
Sampling:	Date/Time	9-21-23 / 1430	Method of Sampling	Sub Peristaltic Pump
	Depth to Water Level:	23.34		
	Sample ID:	L-1		

FIELD PARAMETERS

	°C	pH	MS	NTU
Replicate #1	Temp. 23.6	pH 8.91	Conductivity 900.1	Turbidity 39.3
Replicate #2	Temp. 27.7	pH 8.69	Conductivity 894.6	Turbidity 31.9
Replicate #3	Temp. 22.9	pH 8.54	Conductivity 875.3	Turbidity 47.3
Field Sample	Temp. 22.6	pH 8.30	Conductivity 891.7	Turbidity 48.9

GENERAL INFORMATION

Weather Conditions at Time of Sampling: Sunny 90's
 Sampling Characteristics: Clear
 Containers and Preservatives: pH

Recommendations / Observations: CCR well mark L-1
 Sampling Personnel: Andrew Creel

 (Signed)

Purged dry
