ANNUAL CCR SURFACE IMPOUNDMENT INSPECTION			
Facility Name:		Cleco Brame Energy Center	
Address:		275 Rodemacher Rd. Lena, LA	
Surface Impoundment Name :	Fly Ash Pond	Owner:	Cleco Power LLC
Surface Impoundment ID:	P-0005R1	Operator:	Cleco Power LLC
Nearest City:	Boyce	Parish:	Rapides
Inspector:		Gary J. Leonards, P. E.	
Company:		Providence Engineering & Environmental Group LLC	
Date of Inspection:		12/7/2022	
Weather at Time of Inspection:		Partly Cloudy, Cool	

DESCRIPTION OF THE OPERATION OF THE SURFACE IMPOUNDMENTS:

The Brame Energy Center's Bottom Ash and Fly Ash surface impoundments are designed to accept the coal combustion residual (CCR) byproducts derived from burning of the Unit 2 coal for the generation of electricity. Cleco ceased placement of CCR into the Fly Ash Pond prior to April 11, 2021. The ponds are classified by the Louisiana Department of Environmental Quality (LDEQ) as Type I Surface Impoundments. Water from the Fly Ash surface impoundment is pumped into the Bottom Ash impoundment which discharges by means of three pumps that discharge the wastewater through the outlet pipe on the western end of the pond. This water discharges into Lake Rodemacher via LPDES outfall 401, thence to Bayou Jean de Jean via LPDES outfall 001, then to the Red River. The minimum levee elevation for the Bottom Ash impoundment is 106 feet NAVD 88. To determine the maximum storage capacity, Providence assumed a freeboard of three feet to the top of the impoundment. The bottom elevation of the Bottom Ash Pond as noted in the solid waste permit application is 85 feet MSL. The maximum capacity of this impoundment, with a freeboard of three feet, is approximately 760.5 acre-feet.

The minimum levee elevation for the Fly Ash impoundment is 105 feet NAVD 88. The bottom elevation of the Fly Ash Pond as noted in the solid waste permit application is 85 feet MSL. The permitted capacity of this impoundment is 460.0 acre-feet.

APPENDIX B P.E. CERTIFICATION

FLY ASH POND CCR ANNUAL INSPECTION

PROFESSIONAL ENGINEER CERTIFICATION

I hereby certify that I have inspected Cleco's Brame Energy Center Fly Ash Pond in accordance with the Annual CCR Inspection requirements. This inspection has determined that the design, operation, and maintenance of the Fly Ash Pond is in accordance with generally accepted engineering standards and are adequate for the facility.

This inspection was conducted to assess the general overall condition of the reservoir/dam, identify visible deficiencies, and recommend areas for monitoring, and corrective actions. The inspection is based only on visible features/areas of the dam on the day of inspection. The owner should verify the findings of this report and take corrective actions. This inspection does not relieve the owner/operator from their responsibility to conduct routine inspections, maintenance, repairs, modifications, monitoring, and documentation.
