Additional incentives and energy savings are available to Cleco commercial customers.

Power Wise®

COMMERCIAL KITCHEN EQUIPMENT

REBATE PROGRAM

Power Wise®
CLECO

It Pays to Upgrade

Invest in ENERGY STAR-rated appliances to reduce your operational costs.

Restaurants are some of the most significant energy-consuming investments.

- Owners and investors face narrow profit margins — which can be aggravated by ineffective equipment or high energy usage.
- Commercial kitchens use two to three times more energy per square foot than any other commercial buildings.
- Cooking, water heating, refrigeration and space heating account for nearly 80% of restaurants' average energy usage.
- Ineffective or idle equipment stacks up energy costs and can contribute to other losses, such as food waste, leading to decreased profits.
- A suite of ENERGY STAR-rated commercial food service equipment could save about 99,644 kWh/year or nearly \$5,300/year.

OUR PROGRAM OFFERS:

Rebates from \$30 to \$3,000 on select items

Rebate program applicable to a full range of energy-efficient equipment categories

See a comprehensive list of ENERGY STAR equipment at:

www.energystar.gov/productfinder

Rebate Snapshot

Invest in long-term savings.

Additional Incentives and kWh Savings

The Cleco Power Wise™ Commercial Program can help businesses like yours reduce energy use.

Financial incentives are available for the following energy efficiency upgrades:

- LED lighting
- HVAC change-outs, including split-system air conditioners, heat pumps and chillers

Incentives can pay up to 100% of the improvement cost.

QUESTIONS?

Email energyefficiency@cleco.com or call 1-833-373-6842.

Program funding is limited and participation is on a first-come, first-served basis. Offerings are subject to change without notice. Please allow four to six weeks for processing. This offer is exclusive to installation sites located in Cleco service territory.
